

## Technical Data

---

### Metal Mesh Blankets

Blankets are produced in 2' x 4' standard size, with Mineral Wool insulation from 2" thru 6" thick. Mineral Wool is furnished in 4-LB, 6-LB, 8-LB, & 10-LB densities. Metal Mesh Blankets include the following components:

- Mineral Wool Board/Blanket Insulation
- Wire mesh and/or expanded metal facings
- J-Hook & Locking Washer Attachment

(Note: Blanket assemblies may incorporate galvanized, stainless, or carbon steel facings in various gauges and patterns. Blankets may also include additional components, such as foil reflective barrier, knitted wire mesh, etc.)

---

### Insulated Access Doors

VMS Pre-fabricated Insulated Access Doors are available in a variety of metal types, colors, and finishes. Access Doors, with fully encapsulated and weather-proofed insulation, provide personnel protection and protection against excessive heat loss through un-insulated doors in ducts and other high-temperature structures. Insulation materials include fiberglass and mineral wool board, in thicknesses and densities as required. Door dimensions vary per end-use application but can be made to accommodate virtually any requirement.

---

### Custom Metal Fabrications

VMS custom-designs and builds metal protective coverings for every type of application. Custom Fabrications include: Sonic Horn Covers (for SCR Reactors); Inspection Port Covers; "Hard-Removable" Covers for valves, pumps, & other equipment; Gutters & Downspouts for use with roof-top lagging systems. Contact VMS with your custom covering requirements, and VMS will design and build the solution.
