

Technical Data

Product Description

VMS offers pre-fabricated personnel protection cages in a variety of metals, gauges, and metal forms. These custom coverings provide burn protection for plant personnel without sacrificing the ability to maintain visual inspection capabilities of the equipment, vessels, or fittings enclosed by the coverings. They can also be easily removed and reinstalled when repair or maintenance activities require their removal. As in all VMS custom fabricated products, our Personnel Protection Cages are designed and constructed to insure compliance with all project and plant specifications and design criteria.
